DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a photoelectric encoder, classified in class 250, subclass 231.13.
 - II. Claims 11-44, drawn to a device for detecting position, classified in class 356, subclass 614.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions 1 and 2 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention 1 has separate utility because it discloses the use of an index-grating pattern, which invention 2 does not disclose. In addition, invention 2 discloses the arrangement of the aperture, lens, and detector in an arrangement such that the magnification is a ratio of distances F_s and F . See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
